

Press Release

InSeT Systems LLC is very pleased to announce the appointment of I-Contain as their distributor for areas of the Far East including Hong Kong, Australia, New Zealand, and also the Republic of South Africa. This appointment not only moves InSeT Systems into these very busy areas, it allows the combination of InSeT's Inertial Sensor Tracking and Communications System for GPS denied environments with the above ground locating technology from I-Contain. The combination has the potential to provide complete asset tracking above and below ground with all of the improved safety and operational improvements this type of system can bring.
